Safety	Fold down locking arms Fold up platform barriers Emergency stop button
Configuration	Straight stairway only
Fastening	Direct to wall or via stanchion post

A platform stairlift is an ideal solution for wheelchair accessibility where space is at a premium. Installed onto a straight stairway with a choice of platform sizes, a platform stairlift can make almost any building accessible.

The platform stairlift folds away when not in use to free up stairway space for ambulant users, with a footprint of 290mm deep when folded. Add a fold down seat for a versatile access solution, and customise colours to match your building.
